## 3. NCX Company, Inc.

[Docket No. CP95-139-000]

Take notice that on December 29, 1994, NCX Company, Inc. (NCX), 203 Carondelet, Suite 350, New Orleans, Louisiana 70130, filed in Docket No. CP95-139-000 a petition pursuant to Section 1(b) of the Natural Gas Act (NGA) for a declaratory order exempting facilities to be purchased from Natural

Gas Pipeline Company of America (Natural) from Commission regulation under the NGA, all as more fully set forth in the petition on file with the Commission and open to public inspection.

NCX proposes to purchase from Natural a 0.95 mile pipeline lateral and appurtenant facilities in High Island Block A-270, offshore Texas, for use in NCX's gathering operations. It is stated that the length (less than a mile) and diameter (10 inches) of the lateral are consistent with a determination of gathering for offshore lines. It is further stated that the lower operating pressure of the line and the absence of compression and processing also support a finding of non-jurisdictional gathering.

**Algonquin Gas Transmission Co.;  
Notice of Availability of an  
Environmental Assessment for the  
Proposed Canal Lateral Project and  
Request for Comments on  
Environmental Issues**

January 10, 1995.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) on the natural gas pipeline facilities proposed by Algonquin Gas Transmission Company (Algonquin) in the above-referenced docket. The Canal Lateral Project would be used to deliver up to 75,000 MMBtu per day of natural gas to Canal Electric Company and Montaup Electric Company, joint owners of Unit No. 2 at the Canal Electric Power Plant in Sandwich, Massachusetts.

The EA was prepared to satisfy the requirements of the National Environmental Policy Act. *The U.S. Army Corps of Engineers, New England Division was a cooperating agency in the preparation of this EA.*

The EA assesses the potential environmental effects of the construction and operation of the following facilities in Barnstable County, Massachusetts:

- 4.0 miles of pipeline lateral; and
- one new meter station and one new valve, and modification of one existing valve.

The staff recommends use of the proposed route with a variation at the Herring River crossing. The staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major Federal action significantly affecting the quality of the human environment.

The EA has been placed in the public files of the FERC and is available for public inspection at: Federal Energy Regulatory Commission, Division of Public Information, 941 North Capitol Street NE., Room 3104, Washington, DC 20426, (202) 208-1371.

Copies of the EA have been mailed to Federal, state and local agencies, public interest groups, interested individuals, newspapers, and parties to this proceeding.

A limited number of copies of the EA are available from: Mr. Jeff Shenot, Environmental Project Manager, Environmental Review and Compliance Branch II, Office of Pipeline Regulation, Room 7312, 825 North Capitol Street NE., Washington, DC 20426, (202) 219-0295.

Any person wishing to comment on the EA may do so. Written comments must reference Docket No. CP94-260-000, and must be addressed to: Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426.

Comments should be filed as soon as possible, but must be received no later than February 9, 1995 to ensure consideration before a Commission decision on this proposal. A copy of any comments should also be sent to Mr. Jeff Shenot, Environmental Project Manager.

Comments will be considered by the Commission but will not serve to make the commentor a party to the proceeding. Any person seeking to become a party to the proceeding must file a motion to intervene pursuant to Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214).

The date for filing timely motions to intervene in this proceeding has passed. Therefore, parties now seeking to file

late interventions must show good cause, as required by Section 385.214(b)(3), why this time limitation should be waived. Environmental issues have been viewed as good cause for late intervention. You do not need intervenor status to have your comments considered.

Additional information about this project is available from Mr. Jeff Shenot, Environmental Review and Compliance Branch II, Office of Pipeline Regulation, at (202) 219-0295.
